Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Amendment

1. Applicant's amendment of September 17, 2004 is acknowledged and entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Applicant's remarks have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

4. Claims 1 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ehinger et al. in view of Haaser et al.

Ehinger et al. disclose an electrostatic paint spraying apparatus comprising:

- a bell applicator 8 having a paint receptacle 13 and being movable to and from a docking position;
- a paint canister 6 in the bell applicator connected to the paint receptacle;
- a paint filling station 9 being actuatable to move a paint injector 12 to a docking position to engage the paint receptacle 13.

Haaser et al. teaches a paint filling station comprising at least two paint injectors including valves 135 and 136, each of the injectors being connected to a different color paint, the filling station being actuatable to move each of the paint injectors selectively to a docking position via a rotatable turret 52 along a docking axis for engagement with a paint receptacle for filling the paint canister with different color paints. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of Ehinger et al. by using a filling station as taught by

Art Unit: 3752

Haaser et al. in order to provide different color paints to the tank 6. The device of Ehinger et al. and Haaser et al. is fully capable of carrying out the method of claim 27.

Allowable Subject Matter

5. Claims 6, 7, 9, 21-26, and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 16-20 are allowed.
